**PVC-FREE & SUSTAINABLE
PHARMACEUTICAL STRUCTURES**

75% ALU CONTENT

LID

ADVANTAGES & BENEFITS

- BLISTER foil is **100% fully PVC- NITROSAMINE- & BP-A FREE**
- **UNIVERSAL SEALABLE** against PP, HD-PE, LD-PE, A-PET, PET-G, ACLAR™, PVC
- **UNIVERSAL PRINTABLE** with all different kind of printing technologies
- **-50% reduction of plastic content** compared with PVC based lidding foils: (3,50g/m² heat seal lacquer instead of 7,00g/m²)
- More linear meter in the same reel = **store space and transport cost saving**
- Thickness reduction of HSL = **lightweight foil packaging saves material and energy resources**
- Lidding foil is completely “plug & play”, **no mechanical modifications on blister lines**
- **Less plastics = less cross-permeation**

COLDFORM

ADVANTAGES & BENEFITS

- **>75% of Aluminium content = recyclable** (UNI EN 14021/13430) & 100% fully PVC-FREE
- **Pockets appear more defined and stiff** thanks to more Aluminium content
- Nice & deep penetration of sealing
- Both foils are completely “plug & play”, **no mechanical modifications on blister lines**
- No productivity reduction
- **PE and PP** are used in the pharmaceutical world without any issues since decades
- **Less plastics = less cross -permeation**
